

Server 1U 4bay

Supermicro X11SSL-f

A bare metal server is a physical server dedicated to a single tenant. The server's tenant can optimize the server according to its needs for performance, security, reliability.

Bare metal servers are, just as dedicated servers, a set of physical hardware dedicated to you and not shared with anyone else. Bare metal servers however are usually equipped with the latest and greatest in technology and hardware. They are the prize horse or flagship of a hosting provider.
